University of Maryland College Park Commencement

Chancellor's Message to the Graduates

We are gathered here today to honor some 2,250 graduates from more than 200 fields of intellectual study.

You and your families should be extremely proud of the dedication and perseverance each of you has exhibited in order to be present here today. You selected a goal and stayed with it to successful completion. Congratulations.

The primary purpose of a university is to help individuals acquire the knowledge and skills to be capable of making sound judgments and contributing to the overall advancement of society. In particular, a university must work to create an environment conducive to the discovery, critical examination, preservation and transmission of knowledge, wisdom and values. Therefore, a university must be judged, not only by your accomplishments, which we honor today, but also by your success in working to improve the quality of life which ultimately ensures the survival of present and future generations.

As you embark on a new frontier of life, we hope you will maintain contact with your University. By your past experiences and valuable suggestions, we are best able to discover how to improve our service to the students who follow you, to the citizens of the community, the state and the nation.

Best of luck and every good wish for the future. We hope to hear from you often.

R.L. Gluckstern
Chancellor

Order of Exercises

December 22, 1981
10:00 a.m.

Cole Student
Activities Building

Presiding
Dr. Robert L. Gluckstern
Chancellor
College Park Campus

Master of Ceremonies
Robert F. McCleary
Director, RTVF,
Communications Arts and
Theatre

Processional
Finale,
Grand Symphony by Berlioz
Symphonic Wind Ensemble
and University Chorus
Conductor, John Wakefield

Invocation
The Reverend Wofford K. Smith
Episcopal Chaplain

The National Anthem
Led by Dr. Paul Traver

Greetings
Dr. John S. Toll
President
University of Maryland
Peter F. O'Malley
Chairman, Board of Regents

Musical Selection
Hallelujah Chorus,
Messiah by Handel
University Chorus and
Symphonic Wind Ensemble
Conductor, Dr. Traver

Address
The Honorable
William Donald Schaefer
Mayor of the
City of Baltimore

Conferring of Degrees
Dr. Toll, Honorary Degrees
Dr. Gluckstern

Remarks to Graduates
Kevin L. Fast
Graduating Senior
Dr. Gluckstern

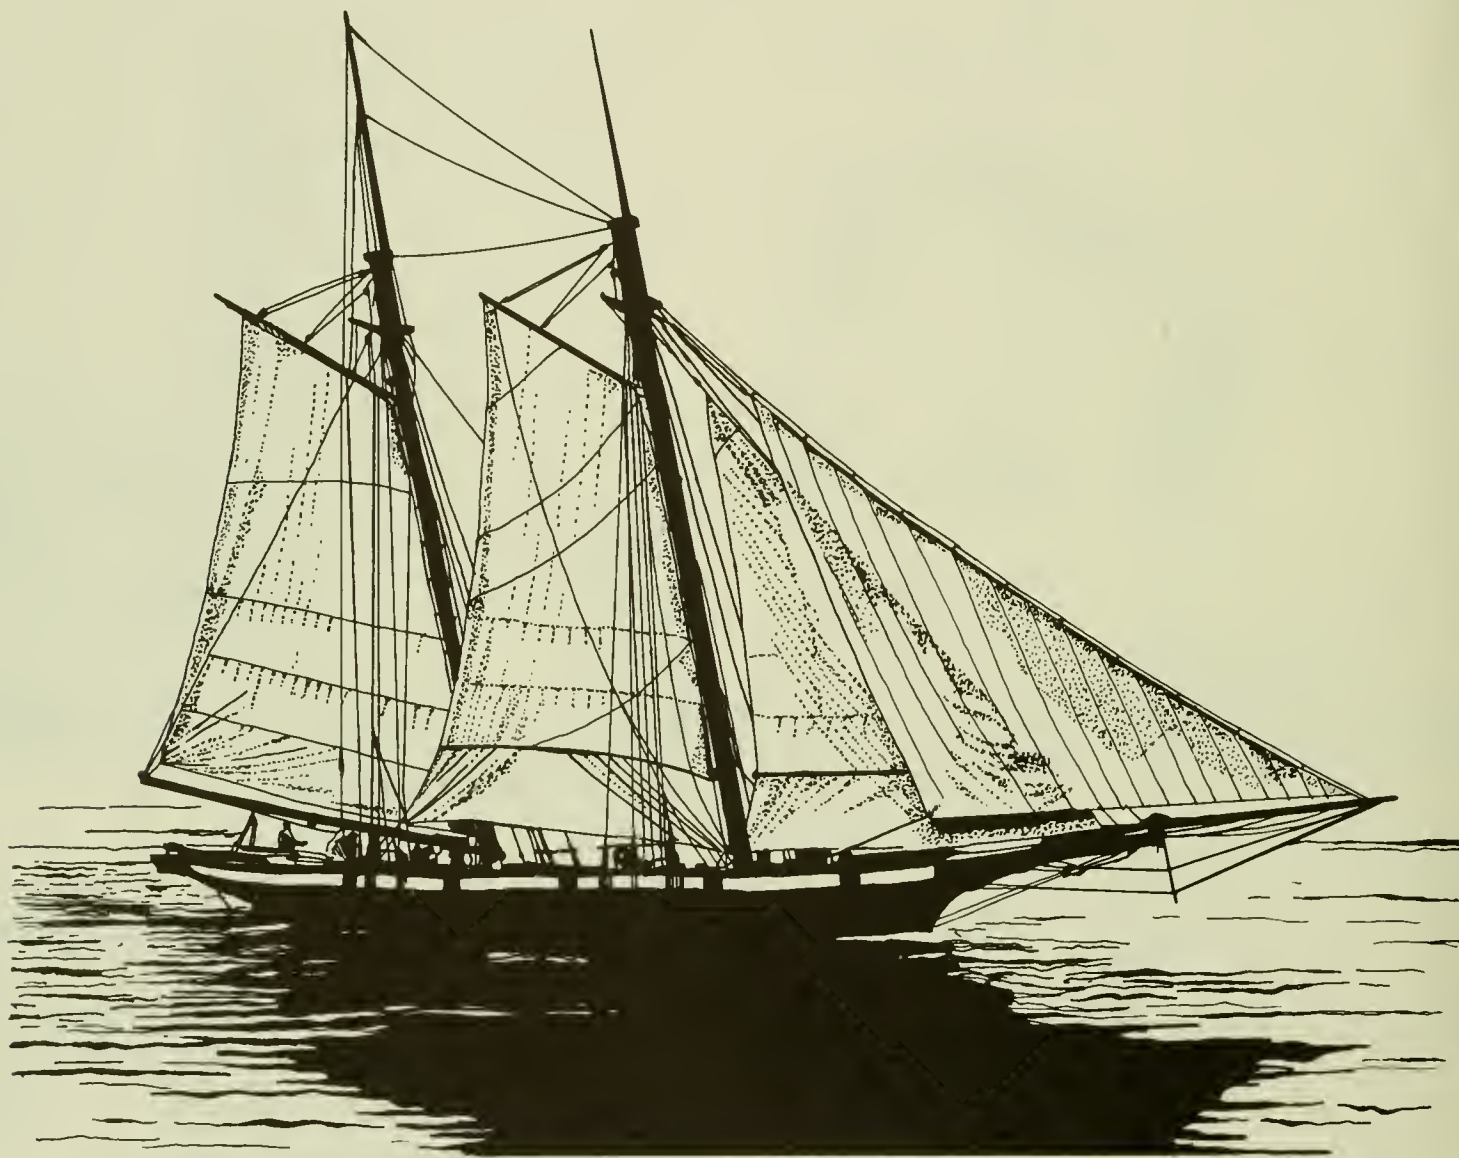

Benediction
The Reverend Elizabeth Platz
Lutheran Chaplain

Recessional
Symphonic Wind Ensemble
Conductor, Mr. Wakefield

The Alma Mater
HAIL! ALMA MATER!
Hail to thee, Maryland!
Steadfast in loyalty
For thee we stand.
Love for the Black and Gold,
Deep in our hearts we hold,
Singing, thy praise forever,
Throughout the land.

Maryland Victory Song
Maryland we're all behind you
Wave high the Black and Gold
For there is nothing half so
glorious
As to see our men victorious.
We've got the team, boys
We've got the steam, boys
So keep on fighting, don't give
in M-A-R-Y-L-A-N-D
Maryland will win.

The Pride of Baltimore

Stephen A. Barron '81

The College Park Campus and The University

The Graduates

The students graduating from the University of Maryland today follow in the footsteps of many notable UM graduates who have distinguished themselves in fields as diverse as science, the arts, entertainment, journalism, business, law, medicine and government.

Through Kermit the Frog, Miss Piggy, and others Jim Henson conveys a refreshing form of entertainment that touches the hearts of young and old alike. By the time he graduated from UM in 1960, Henson was developing successful TV commercials in the area. "The Muppet Show," created in 1976, is syndicated on about 125 stations in the U.S. and is seen in some 40 other countries.

The first woman elected to the Supreme Court of Michigan, Mary Stallings Coleman has been influential in developing many innovative programs for juvenile welfare. A 1935 arts and sciences graduate of UM, Coleman is a firm believer in rehabilitation and crime prevention and has established pre-court services for children in danger of becoming school drop-outs and education programs for underprivileged mothers in an effort to curb child abuse in Michigan.

Known as one of the youngest graduates of the University, Charles Fefferman graduated in 1966 at 17 when he received a joint degree in mathematics and physics, just three years after becoming a full-time UM student. One of the world's top mathematicians, Fefferman received the Fields Medal, the most prestigious award a mathematician can receive. He is currently a professor of mathematics at Princeton.

In the field of consumer affairs, UMCP graduate Meredith M. Fernstrom, rates as one of the nation's top experts on consumer issues. She is currently American Express Company's new Vice President for Consumer Affairs, and before that she served as the Special Assistant to the Secretary and Director of Consumer Affairs in the U.S. Department of Commerce.

Other outstanding UM graduates include Connie Chung, a 1969 journalism graduate, who anchors the news at KNXT-TV in Los Angeles; Carmen Balthrop, a Metropolitan Opera singer and 1971 UMCP Music Alumna; and Tom McMillen, a 1974 Arts and Sciences graduate and Rhodes Scholar, who is playing professional basketball for the Atlanta Hawks.

The Campus

In enrollment, College Park is among the 10 largest campuses in the country. Undergraduates enrolled in fall 1981 numbered 30,002 and graduate students, 7,526 for a total enrollment of

37,528. This year's College Park operating budget is approximately \$166,743,000. The University assisted over 13,000 College Park students with financial aid in 1980-81.

Students may choose from 115 undergraduate and 84 graduate programs leading to degrees. In 1980-81, a total of 5,616 undergraduate, 1,063 master's and 347 doctorate degrees were awarded by the College Park Campus. In the number of doctorates granted annually, the University ranks among the top 30 in the nation.

History

The University had its beginnings in 1807 with the establishment in Baltimore of the College of Medicine, an entirely faculty-owned institution granting the M.D. degree. When its name was changed to the University of Maryland five years later, it was given power to confer additional degrees. The first dental school in America, the Baltimore College of Dental Surgery, became a part of the University in 1840.

Subsequently, the University opened schools of pharmacy, law and nursing. Under a charter secured by a group of Maryland planters in 1856, the College Park Campus of the University, then called the Maryland Agricultural College, opened in 1859 and became one of the original land-grant schools in 1865. After a disastrous fire in 1912, the State acquired control of the College and bore the cost of rebuilding. In 1920, the State took over the faculty-owned University of Baltimore, merging it with the State-owned institution at College Park to form the present-day University of Maryland.

In 1886, the Delaware Conference Academy was founded by the Methodist Church in Princess Anne, Maryland. The State acquired this institution in 1948, at which time it became known as Maryland State College. It was made a campus of the University in 1970, and is known as the University of Maryland, Eastern Shore (UMES). A new campus known as University of Maryland Baltimore County (UMBC) was opened at Catonsville in 1966.

Libraries

University libraries include approximately 1,472,031 volumes on the College Park Campus, 16,737 subscriptions to periodicals and newspapers, plus over a million microform units.

The Hornbake (Undergraduate) Library has a seating capacity of 4,000 students and is among the nation's largest. Facilities include a quadraphonic concert room, color video-tape players and playback units, enclosed rooms

equipped with instructor's consoles for the use of nonprint media materials, and wireless stereo headsets for tapes of lectures, plays, speeches and music.

Research Facilities

Among the exceptional research facilities on Campus are: scanning electron microscopes; subsonic, supersonic, and hypersonic wind tunnels; laboratories for radiation research and biochemical reactions; a nuclear training reactor; an electron ring accelerator; complete laboratories for the dynamic studies of soils and structures; a unique facility utilizing satellite remote sensing data; a dynamic photomechanics lab; a precision encoder and pattern recognition device; a gravitational radiation detection system including a gravimeter on the moon; a psychopharmacology lab; three retroreflector arrays on the moon; rotating tanks for laboratory studies of meteorological phenomena; a linear accelerator; a high resolution spectroscopy facility; a laboratory for basic behavioral research; an assortment of computers; a computer vision lab; the Astronomy Observatory; a laboratory for plasma and fusion energy studies, remote sensing and cartographics labs; an anechoic chamber for audiology research; a criminal forensics lab and the Water Resources Research Center.

The College Park Campus also operates one of the largest and most sophisticated long-wavelength radio telescopes (located at Clark Lake, Southern California).

In addition to these research opportunities, programs in the behavioral sciences, social sciences and education exist in many bureaus and institutes including: the Bureau of Business and Economic Research, Bureau of Educational Research and Field Services, Bureau of Governmental Research, Institute for Child Study, Institute for Criminal Justice and Criminology and the Institute for Urban Studies.

Academic Costume

The black caps and gowns worn by the students and faculty in the academic procession are of ancient origin. They have been the traditional costume of the scholar since medieval times and probably represent an adaptation of the ecclesiastical dress since many of the scholars of that period were members of monastic orders.

An intercollegiate commission in 1893 drafted a uniform code for costumes which has since been adopted by the majority of colleges and universities in the United States.

Each of the three academic degrees—bachelor, master and doctor—has its own distinctive gown and hood. The

bachelor's gown is distinguished by its long pointed sleeve. The master's gown has a longer, narrow, closed sleeve, extending below the knee; the arm is passed through a slit at the elbow. In contrast, the doctor's gown has a full bell-shaped sleeve with three bars of velvet. The opening of this gown is faced with wide velvet bands. The velvet trim may be black or of a color indicating the general field of learning of the wearer, for example, blue for philosophy, green for medicine, purple for law.

The most colorful and distinctive item of the academic costume is the hood which passes around the neck and extends down the back. The doctor's is the largest of the hoods and the bachelor's the smallest. The bachelor's hood is often omitted. The color of the velvet edging indicates the field of learning. Below is given a list of department or faculty colors.

Agriculture/Maize
Arts, Letters, Humanities/White
Business Administration, Commercial Science/Drab
Dentistry/Lilac
Economics/Copper
Education, Pedagogy/Light Blue
Engineering/Orange
Fine Arts, Architecture/Brown
Forestry/Russet
Home Economics/Maroon
Laws/Purple
Library Science/Lemon
Medicine/Green
Music/Pink
Nursing/Apricot
Oratory/Silver Gray
Pharmacy/Olive
Philanthropy/Rose
Philosophy/Blue
Public Health/Salmon
Physical Education/Sage Green
Science/Golden Yellow
Social Service/Citron
Surgical Chiropody/Nile Green
Theology and Divinity/Scarlet
Veterinary Sciences/Gray

The colors of the silk lining exposed in the center of the hood are those of the college or university which conferred the degree.

The cap or "mortar board" is uniform in design for all

degrees. The tassel may be either black or the color of the field of learning. The tassel of the doctor's cap may be gold.

From Europe the use of academic degrees spread to English universities. Harvard University, the College of William and Mary, and Yale University followed the British pattern in the United States.

Academic Degrees

The degree is awarded for the successful completion of a course of study. There are more than 1,000 different academic degrees currently conferred by American colleges and universities.

The first known degree was a doctorate conferred by the University of Bologna (Italy) in the middle of the 12th Century. Originally, the doctor's and master's degrees were used interchangeably, each indicating that the holder was qualified to give instruction to students. The bachelor's or baccalaureate degree indicated only entrance upon a course of study preparatory to the doctorate or mastership. Gradually, however, the bachelor's degree came to mean successful completion of one level of study preparatory to the higher degrees.

The Doctor's Degree

This is a term meaning teacher, or instructor, applied by ancient Romans to those who delivered public lectures on philosophical subjects. In the Middle Ages, from the 12th century, it came into use as a title of honor borne by men of great learning. It was first made an academic title at the University of Bologna, which received from the emperor the right of appointing *doctores legum* (doctor of laws). The University of Paris followed in 1145. Soon after, the popes granted the universities the right of appointing doctors *canonum et decretalium* (teachers of the canon law), and when the study of civil law came to be combined with that of the canon law, the title was changed to *doctor utriusque juris* (teacher of both laws). The faculties of theology and medicine followed that of law in conferring this title.

The doctorate in philosophy and science, and occasionally in theology and law, is given beyond the baccalaureate degree and requires two to five years of study, the writing of a thesis, and the passing of written and oral examinations. The doctor's degree represents the most advanced earned degree conferred by American institutions. There are two distinct types: the professional or practitioner's degree and the research type. The first type represents advanced training for the practice of various professions, principally Doctor

of Medicine, Doctor of Dental Surgery, Doctor of Veterinary Medicine, Juris Doctor and Doctor of Pharmacy. These degrees carry no implication of original research and are classified by the U.S. Office of Education, with bachelor's degrees, as the first professional degrees. The University of Maryland awarded the first two dental degrees in history, on March 9, 1841, and invented the name of the degree, D.D.S., as well.

The second type of doctor's degree is classified as the research doctorate representing prolonged periods of advanced study, usually accompanied by a dissertation which is designed to be a substantial contribution to existing knowledge on the subject. The most important of these, the Doctor of Philosophy, no longer has an implication of philosophy for its holder, but represents advanced research in any of the major fields of knowledge. It was first awarded in the United States by Yale University in 1861.

The first Ph.D. was awarded by the University of Maryland in 1920.

The Master's Degree

The master's degree is an academic honor conferred upon students who have successfully completed work in advance of the baccalaureate. A thesis and an oral examination are usually required. The word *magister*, connected with a qualifying phrase, was used among the Romans as a title of honor, but its present meaning must be traced to the time of the establishment of the oldest universities. Regularly organized facilities were not then known as they now exist in the universities. The whole circle of academic activity was limited to seven liberal arts, and those who received public honors on the completion of their courses of studies, for their diligence and knowledge, and had already received the degree of baccalaureate (bachelor) were called *magistri artium* (master of the liberal arts).

In 1920, the new University of Maryland awarded its first M.A. and M.S. degrees in fields other than agriculture.

The Bachelor's Degree

The bachelor's degree represents completion of a four-year course of study of collegiate grade and is the oldest academic degree used by American institutions of higher learning. The degree, Bachelor of Arts, was the first conferred in America in 1642 on the first nine graduates of Harvard College.

Maryland Agricultural College, which was later to become the University of Maryland College Park, awarded the first Bachelor of Arts and Bachelor of Science degrees in 1862.

William Donald Schaefer

Honorary Doctor of Laws and Commencement Speaker

Other American mayors have every right to be envious. For Baltimore's mayor—William Donald Schaefer—has transformed the city once derided as "Washington's Brooklyn" into an urban showcase. More than any other man, he is the acknowledged driving force behind Baltimore's recent and remarkable resurgence. In the words of one writer, he "has become a symbol that city hall cares."

His commitment as a mayor is perhaps without precedent. When federal funds to his town were cut, the mayor brought together local businessmen who promised \$200,000 to rescue city hall programs. And when vacant homes began to proliferate, he did not throw up his hands or ignore them; he put the homes on the market for \$1 apiece and set up low interest financing so new homeowners could rehabilitate the property.

The Inner Harbor area is one of the most often repeated Schaefer-backed success stories in Baltimore. Once a damp, grimy waterfront area, it now glistens with new office towers, quaint shops, hotels, and restaurants. Harborplace and now the National Aquarium anchor the Inner Harbor and have transformed it into a cultural magnet that attracts tourists from across the world.

The mayor eats, drinks, and sleeps Baltimore. He lives in the same West Baltimore rowhouse in which he was born. He also earned his law degree from the University of Baltimore and labored 19 years as a Baltimore city councilman. Along the way he has learned how to take on the bureaucracy—a singularly important mayoral trait. Both the Inner Harbor and the subway system, for example, resulted from his creation of quasi-public commissions that expedited the use of federal, state, and city money.

Mayor Schaefer works 18-hour days during the week, touring the city on weekends. All the while he dashes off "Mayor's Action Memos" which cover anything from dirty alleys to potholes to dead trees in need of cutting. When he finally takes a vacation, it's a one-week trip to Ocean City, with boxes and boxes of official business in tow.

In short he is a man in love with his city and the people in it.

Today he is awarded an Honorary Doctor of Laws from the University of Maryland.

Sergiu Comissiona

Honorary Doctor of Fine Arts

To say that Sergiu Comissiona is music director of the Baltimore Symphony is to narrowly constrict the professional scope of a man who conducts three orchestras, guest conducts in Europe and performs in summer festivals, as well. One of today's most sought-after conductors, he can be more accurately characterized—without exaggeration—as a conductor for the world.

"At the age of six I already knew I wanted only to conduct," says Comissiona, who now lives the very life he once dreamed about. Besides his Baltimore responsibilities, he is artistic director of the Houston Symphony and principal conductor for the Netherlands Radio Orchestra. Since an impromptu conducting debut at the age of 17 in his native Romania, Comissiona has directed major symphonies and opera orchestras in 21 countries and on six continents. He has recorded with the Baltimore, Goteborg, and Haifa symphonies, the Stockholm Philharmonic, Israel Chamber Orchestra and the l'Orchestre de la Suisse Romande.

"How does one manage all this?" he asked, rhetorically in *Keynote* magazine. "I suppose it is primarily with good humor, vitamins, and an understanding wife..."

Comissiona, who may travel to three different U.S. cities in one day, believes that his hectic pace and rapid change of scenery and personalities invigorate him. "... What I consider the best medicine for me is the constant learning experience and the expansion of my artistic and musical horizons," he says.

The conductor was born in Bucharest in 1928 to musical parents. He studied violin, theory and composition and, with his own mother singing the part of Marguerite, did his initial operatic conducting in 1945 on heady material: Faust.

One year later he joined the Bucharest Radio Quartet, making his official conducting debut with the Bucharest Opera Orchestra. In 1950 he was made music director of the Romanian State Ensemble. And five years later Comissiona was named principal conductor of the Romanian State Opera—a post he kept until he and his wife Robinne emigrated to Israel in 1959.

He first appeared with the Baltimore Symphony in 1967 and was appointed music director of the orchestra in 1969, having enjoyed interim guest appearances with the group.

Comissiona's associations with Baltimore have been mutually satisfying. The city designated a "Sergiu Comissiona Day" in recognition of his accomplishments and several of its universities have awarded him honorary doctorates.

Conversely, the conductor takes great pride in his American citizenship, bestowed upon him and his wife July 4, 1976, in Bicentennial ceremonies at Baltimore's Fort McHenry, birthplace of "The Star Spangled Banner".

Today he is awarded the Honorary Doctor of Fine Arts from the University of Maryland.

Stephen A. Darrow '81

Joseph Meyerhoff

Honorary Doctor of Humane Letters

In Baltimore and around the world, Joseph Meyerhoff's name is synonymous with philanthropy and civic-mindedness.

Born in Russia, the 82-year-old real estate developer and 1920 University of Maryland Law School graduate has lived out the ultimate American dream: He is a self-made man, a man of influence, and a repository of leadership in his community. He remains active as chairman of the board of Magna Properties, Inc.

Meyerhoff has used his considerable fortune to better the community he has long called home—Baltimore.

Business was a family affair for the Meyerhoffs. When his father's construction company began to fail in the Depression, a determined Meyerhoff started a firm of his own. And with Meyerhoff at the helm, that firm eventually evolved into the Monumental Corporation, a firm which *Fortune* magazine rated as the 39th largest diversified financial company in the United States.

When the federal government was offering strong incentives for suburban residential development after World War II, Meyerhoff and his brother Jack grabbed the ring, building thousands of homes in the Essex-Dundalk area just east of the Baltimore city limits, and in the late 1940's he pioneered development of the suburban shopping center with the opening of Edmondson Village on the city's west side.

From Associated Jewish Charities to Israel Bonds to the United Way, Meyerhoff has given leadership to a variety of causes. One of his most beloved civic endeavors has been the Baltimore Symphony. President and chairman of the Baltimore Symphony Association since 1965, he has played a prominent role in the group's resurgence, contributing \$9 million toward construction of a badly needed symphony hall and successfully lobbying in its behalf in Annapolis.

In 1970, Meyerhoff joined with Associated Jewish Charities of Baltimore to endow the Louis L. Kaplan chair of Jewish Historical Studies at the University of Maryland. More recently, in honor of Joseph and Rebecca Meyerhoff's sixtieth wedding anniversary, their son and daughter-in-law, Harvey and Lyn Meyerhoff, endowed in perpetuity "The Joseph and Rebecca Meyerhoff Center for Jewish Studies" at the University of Maryland.

One leading Baltimore civic leader recently said of Meyerhoff that "Joseph Meyerhoff was involved in charitable activities even before he became wealthy."

And Meyerhoff himself has said that the greatest joy his wealth has given him has been the opportunity to give it away. Obviously, he is a very happy man.

Today he is awarded the Honorary Doctor of Humane Letters from the University of Maryland.

Counseling and Personnel Services: *Effects of Varying Written Descriptors of Structured Groups on Attitudes, Information Seeking, and Help Seeking.*
- Susan Blourock Nelson
Early Childhood/Elementary Education: *A Survey of Parental Involvement in Private Day School Programs for Learning Disabled Children.*
- Charles G. Nitsche
American Studies: *Libertarianism and American Conservative Thought: The Careers of Albert J. Nock and Frank Chodorov.*
- Kusum U. Ohri
Secondary Education: *A Study of the Assessment of Pictorial Depth Perception of Indian Children on Specific Pictorial Depth Discrimination Tasks.*
- Samuel Chris Idowu Oladipo
Government and Politics: *The Importance of Agriculture to the Process of Political Economic Development: A Model for Nigeria, An Alternate Use of the Petrol Dollars.*
- Shelley Ann Peabody
Psychology: *The Use of Leary's Interpersonal Theory and Methodology in Predicting Psychotherapeutic Outcome.*
- Ravi P. Pereira
Biochemistry: *The Effects of AY-9944 on the Sterol Composition of Saccharomyces Cerevisiae.*
- Rachel Monteith Petty
Human Development
Education: *The Effect of Child Variables on the Affective Responses and Disciplinary Choices of Child Abusers.*
- Janet Booher Phillips
Human Development
Education: *Changes in Moral Judgment in Adult Years.*
- Alan James Pue
Electrical Engineering: *Vehicle Distribution and Routing in a Large Automated Transportation Network.*
- James Allen Reggia
Computer Science: *Knowledge-Based Decision Support Systems: Development Through KMS.*
- Ronald H. Reis
Secondary Education: *An Investigation of Poor Comprehenders' Instantiation of Oral and Written Discourse for Easy and More Difficult Materials.*
- Shereen Gale Remez
Human Development
Education: *Work Satisfaction and Work Performance in Homosexual Men and Women.*
- Kathryn Louise Riley
English Language and Literature: *Suburbia in the Fiction of John O'Hara, John Cheever, and John Updike.*
- Brenda J. Davis Rowe
Government and Politics: *The Organizational Structure and Functioning of the Evaluation of a National Field Demonstration Project: Implications for the Development of Public Policy Via Social Field Experimentation.*
- Donald Gene Ruch
Botany: *Ultrastructure and Cytochemistry of the Basidiospore of Psilocybe cubensis.*
- Wallace Stephen Rutkowski
Computer Science: *Shape Segmentation and Labeling.*
- Kazuhide Saigo
Chemistry: *Synthesis of 2,6,7,-Trioxabicyclo [2.2.2.] Octanes which Expand on Polymerization.*
- Chhanda Basu Samanta
Physics: *A Study of Proton and Alpha Particle Induced Quasifree Knockout Reactions.*
- Jae-Kyung Eom Schemm
Meteorology: *A Numerical Study on the Interaction of Atmospheric Gravity Waves and Cumulus Convection.*
- David Linton Searles
Human Development
Education: *Covert Reinforcement through Mental Imagery as a Means of Changing Adolescent Self-Concepts.*

Arun Shukla

Mechanical Engineering: *A Study of Energy Loss and Its Mechanisms during a Fracture Event.*

Madeline Louisa Simpson

Human Development
Education: *Effects of Time of Day on Performance of Seventh Grade Students on Two Measures of Impulse Control.*

Thomas Ambroz Skrovanek

Chemical Engineering:
Development of Monitoring and Control Methods for Continuous Fermentation Processes.

Nancy Genzmer Smith

English Language and Literature: *The Darkening Vision of Sir John Vanbrugh: With a Critical Edition of The Pilgrim.*

Margie Fay Stanton

Nutritional Sciences: *Associations among Dietary Vitamin C, Dietary Calcium, Gingival Disease, Bone Strength, and Other NHANES I Measurements of Health and Nutritional Status in U.S. Men and Women.*

Nancy Backer Stark

Special Education: *Children with Learning Problems—Explicit Feedback and the Retention of Training in the Use of Categorical Grouping as a Mediatlional Strategy.*

Edward Brice Stephens

Microbiology: *The Isolation and Molecular Characterization of Infectious Pancreatic Necrosis Virus from "Spinning" Atlantic Menhaden in the Chesapeake Bay.*

Mary Johnson Stephenson

Agricultural and Extension Education: *Family Role Analysis: An Integration of Roles by Married Women in College.*

Maureen Mulroy Thomas

Human Development
Education: *The Effect of Amniocentesis on Parental Anxiety and Self Concept.*

Elaine Ann Vande Hei

Special Education: *Preleadership and Leadership Competencies of Moderately Retarded Adolescents.*

Shirley A. Wagoner

Early Childhood/Elementary Education: *Relationships Between Reading Readiness, the Prereading Child's Comprehension of Certain Deictic Terms Involving a Shift in Perspective, and First Grade Reading Achievement.*

Deborah Judith Waranch

Special Education: *Training Special Education Student Teachers How to Communicate Test Results to Parents of Exceptional Children through Microcounseling.*

Rochelle G. Weinberger

Counseling and Personnel Services: *Depressive Symptomatology and Attributional Processes in Learning Disabled and Nondisabled Boys.*

John Howard Wells

Agricultural and Extension Education: *Lobbying Strategies: Implications for Increasing County Appropriations for the Maryland Cooperative Extension Service.*

Felecia Thompson White

Agricultural and Extension Education: *An Analysis of Young Middle Class Black Women's Involvement in Continuing Education, Occupational Success, and Aspirations.*

Naohiro Yashiro

Economics: *Women in Japanese Labor Markets.*

Howell Hang Zee

Economics: *Tax Incidence in a Two-Sector General Equilibrium Model.*

Doctor of Business Administration

Charles Richard Enis

Business and Management: *The Impact of Replacement Cost Information Upon the Decisions of Individual Investors.*

Candidates for Degrees

DECEMBER 22, 1981

The 1981 class roster comprises degree candidates from the undergraduate and graduate programs at the University's College Park Campus. As final action cannot always be taken for candidates by the time this program is printed, the list of candidates here is tentative only. The University reserves the right to withdraw or add names. All diplomas will be mailed by the Records and Registrations Office.

Students who have earned their degrees from the College of Education may obtain a Statement of Certificate Eligibility in the College of Education, Student Services Office (Room 1210). Other students who have completed teacher education programs will receive their statements in the mail (separate from the diploma) upon verification of required coursework.

GRADUATE SCHOOL

*Candidates will be presented by
Dr. Rose-Marie G. Oster,
Administrative Dean for
Graduate Studies and Research*

Doctor of Philosophy

Judith A. Abbott

*Food Science: Apple Texture:
Relationship between Sensory
Texture Attributes and Com-
pression Test Data.*

Douglas Carl Abrams

*History: North Carolina and the
New Deal, 1932-1940.*

Scholarship Honors

Candidates for bachelor's degrees who have earned honors of scholarship upon graduation are indicated in the alphabetical listings of Divisions, Colleges or School. To be eligible for consideration for such honors a candidate must meet the following general criteria: (1) have completed two years of work at the University of Maryland (60 semester hours, 30 of which were at College Park) and (2) have a scholastic average of B (Grade Point Average of 3.000) or higher in University of Maryland work prior to the last semester of registration before award of degree.

December 1981 candidates who meet these criteria are shown in the alphabetical lists as qualifying, upon graduation, for the designations "Summa Cum Laude" if they ranked in the top two percent of the candidates in their respective Divisions, Colleges or School; "Magna Cum Laude," if in the next three percent; or "Cum Laude," if in the next five percent, based on the grade point averages of students in the preceding three graduating classes.
